

Work-related injury fatalities

Key WHS statistics Australia 2022

Safe Work Australia compiles the Work-related Traumatic Injury Fatalities data set which provides national statistics on all workers and bystanders fatally injured at work. This data draws on a range of information sources, including:

- initial reporting of fatalities in the media or on relevant authority websites such as police, road authorities and the Australian Transport Safety Bureau
- notifications to Safe Work Australia from the jurisdictional authorities, and
- the National Coronial Information System which provides confidential access to coroners', police and other investigative reports.

Work-related fatalities resulting from diseases, natural causes and suicides are excluded. Further explanatory notes on the data can be found in the [Explanatory notes for Safe Work Australia datasets](#).

This document provides statistics about people who die from an injury sustained in the course of a work activity (worker fatalities) in Australian territories or territorial seas.

Trends in worker fatalities, 2003 to 2021

Worker fatalities by gender, 2021

Work-related injury fatalities

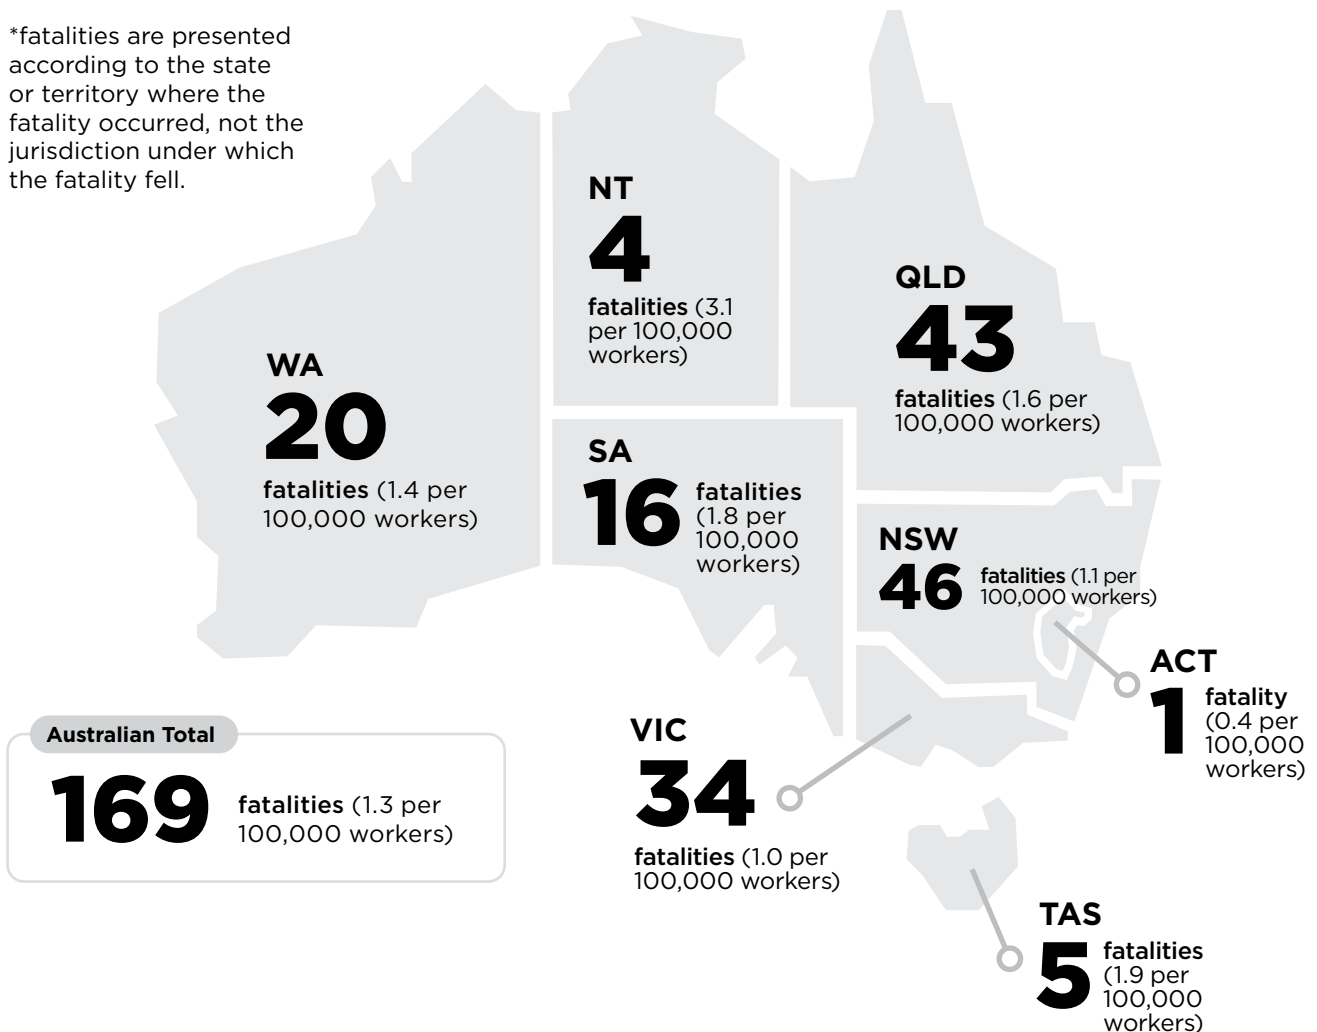

Key WHS statistics Australia 2022

Worker fatalities by age group, 2021

Age group (years)	Number of fatalities	Fatality rate (fatalities per 100,000 workers)
Under 25	16	0.9
25-34	22	0.7
35-44	26	0.9
45-54	33	1.2
55-64	43	2.2
65 and over	29	4.5
Total	169	1.3

Worker fatalities by state/territory, 2021*

*fatalities are presented according to the state or territory where the fatality occurred, not the jurisdiction under which the fatality fell.

Work-related injury fatalities

Key WHS statistics Australia 2022

Worker fatalities by mechanism of incident, 2021

Note:

- only mechanisms accounting for 5% or more of fatalities are included. The remaining mechanisms are grouped together under other mechanisms.
- the percentages shown in this table have been rounded to the nearest whole number; therefore the sum of percentage figures for each column may not equal the total.

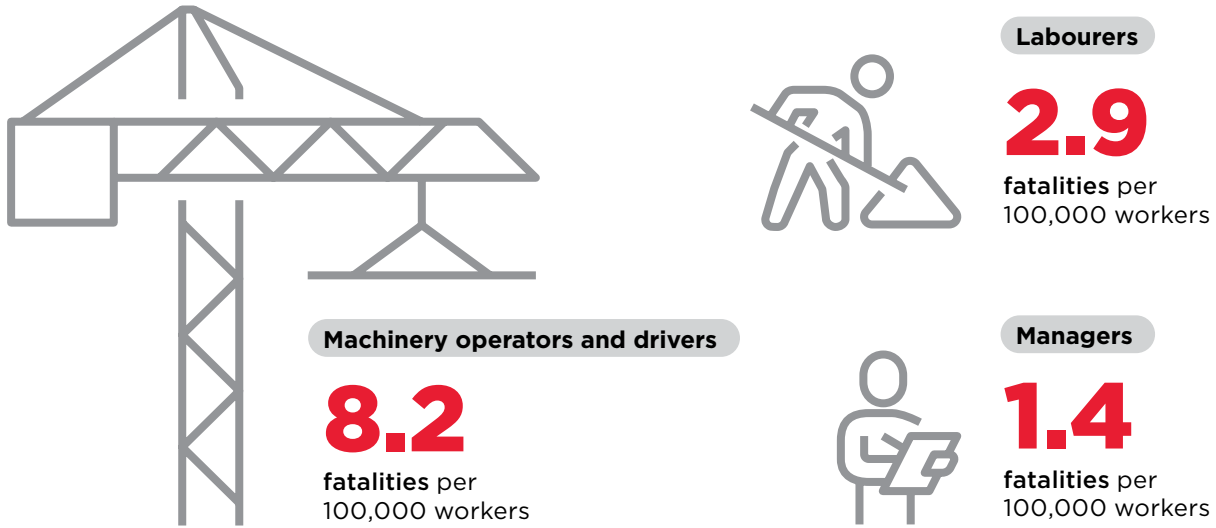

Mechanism of incident	Number of fatalities	% of fatalities
Vehicle collision*	64	38%
Being hit by moving objects	24	14%
Falls from a height	19	11%
Being hit by falling objects	16	9%
Being trapped by moving machinery	11	7%
Other mechanisms	35	21%
Total	169	100%

*vehicle collisions include fatalities that occurred as a direct result of a vehicle crash. Vehicles include not only road vehicles such as cars and trucks, but also machines such as aircraft, boats, loaders, tractors and quad bikes.

Work-related injury fatalities

Key WHS statistics Australia 2022

Worker fatalities by occupation, 2021

Occupation	Number of fatalities	Fatality rate (fatalities per 100,000 workers)
Machinery operators & drivers	68	8.2
Labourers	34	2.9
Managers	24	1.4
Technicians & trades workers	22	1.2
Community & personal service workers	12	0.8
Professionals	6	0.2
Sales workers	2	0.2
Clerical & administrative workers	1	0.1
Total	169	1.3

Work-related injury fatalities

Retail trade	1	0.1
Financial & insurance services	0	0.0
Information media & telecommunications	0	0.0
Total	169	1.3

Work-related injury and disease

Key WHS statistics Australia 2022

Safe Work Australia compiles the National Dataset for Compensation-based Statistics (NDS) which comprises information on workers' compensation claims provided by each of the jurisdictional workers' compensation authorities.

Data in this report refers to serious claims only. Serious claims include all accepted workers' compensation claims for an incapacity that results in a total absence from work of one working week or more, excluding fatalities and journey claims. Data for 2020-21 are preliminary (denoted by a 'p') and subject to revision in future years as further claims are finalised. Further explanatory notes on the data can be found in the [National data set for compensation-based statistics for Safe Work Australia](#).

Serious claims statistics, 2020-21p*

130,195

total serious claims

Frequency rate

6.5

serious claims per million hours worked

Median time lost

7

weeks per serious claim

Median compensation paid**

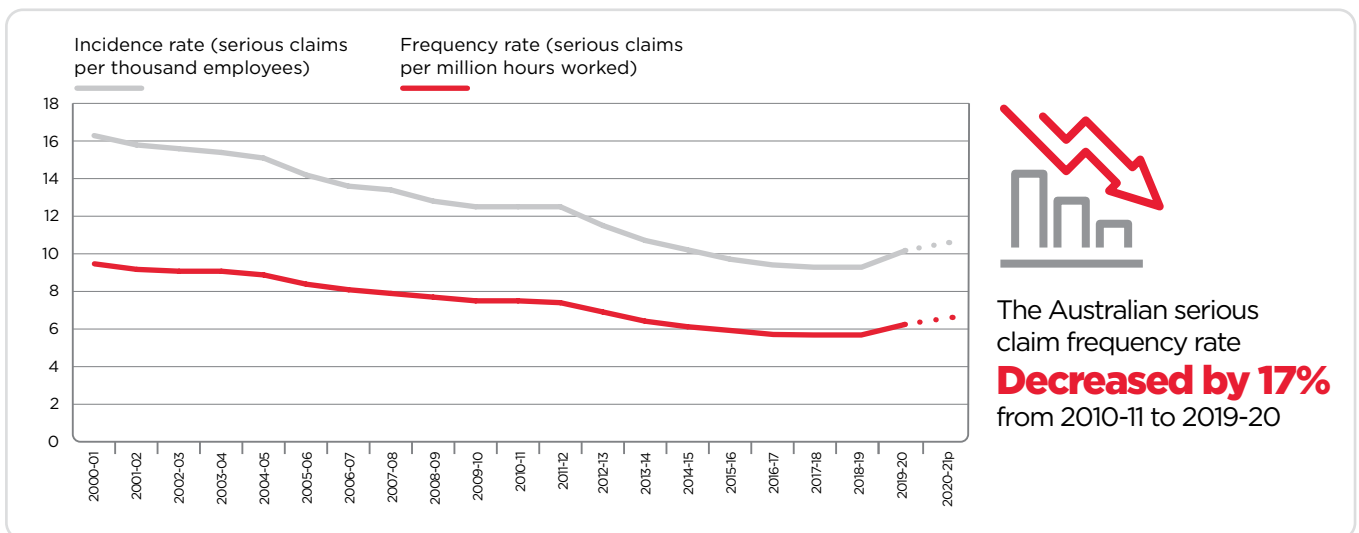

\$15,072

per claim

*preliminary data subject to revision in future years as further claims are finalised.

** the median includes serious claims where the payment made was greater than zero.

Serious claim rate, 2000-01 to 2020-21*

*preliminary data subject to revision in future years as further claims are finalised.

Work-related injury and disease

Key WHS statistics Australia 2022

Mental health conditions, 2020-21p*

12,155

Serious claims
Mental health conditions accounted for **9% of serious claims**

*preliminary data subject to revision in future years as further claims are finalised.
**the median includes serious claims where the payment made was greater than zero.

- Mental health conditions account for a relatively small but increasing proportion of serious claims, rising from **6%** of all serious claims in 2014-15 to **9%** in 2020-21p.
 - In 2020-21, the largest share related to anxiety or stress disorders (**36%**) or reaction to stressors – other, multiple or not specified (**34%**).
- Workplace mental health conditions are one of the costliest forms of workplace injury. Our data show that they lead to significantly more time off work and higher compensation paid when compared to physical injuries and diseases. In 2019-20:
 - The median time lost for mental health conditions was **30.7 working weeks** per serious claim, compared to **6.2 working weeks** per serious claim for physical injuries and diseases.
 - The median compensation paid was **\$55,270** per serious claim, compared to **\$13,883** for physical injuries and diseases.
- The median time lost (in working weeks) for mental health conditions has increased markedly in recent years, from **18.8 working weeks** in 2015-16 to **30.7 working weeks** in 2019-20.

COVID-19 claims***

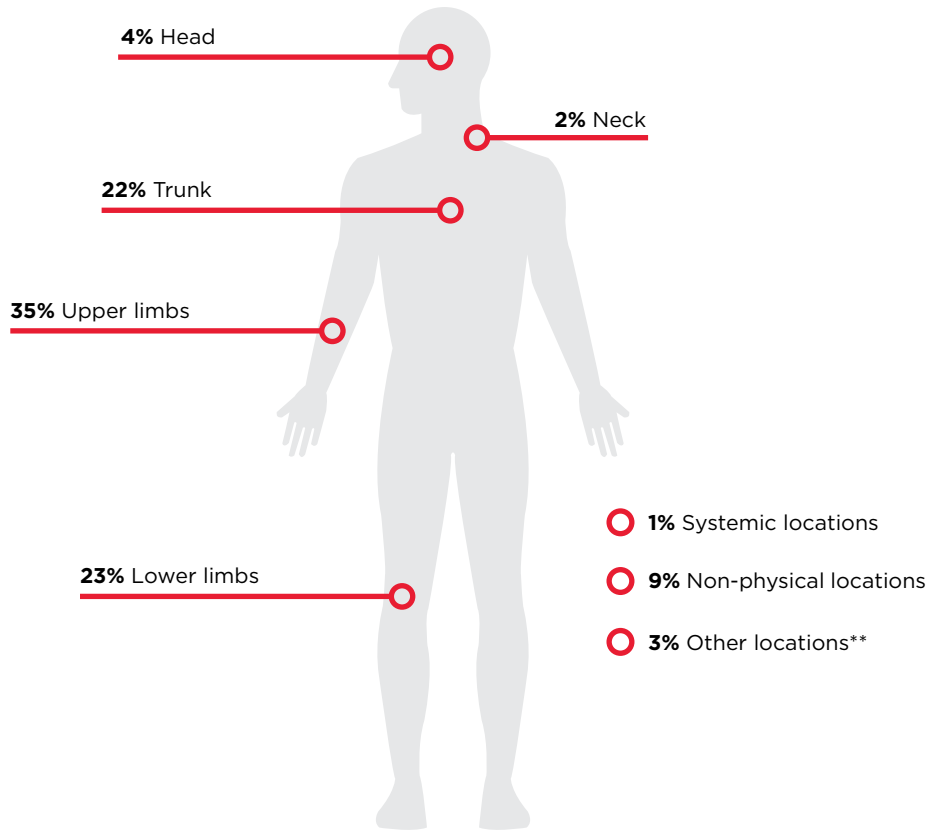

***the COVID workers' compensation claims data need to be interpreted carefully in the context of the reference period for this data, the difficulty in establishing a work connection to transmission of the virus and the possibility that workers with COVID-19 may not have applied for compensation and instead used personal leave.
