

Safety
every job, every day

SafeTea

Customisable discussion dice

Instructions

1. Print the template.
2. Cut along the exterior lines.
3. Add your workplace specific SafeTea event talking points to the dotted lines.
4. Fold along the interior lines to shape the cube.
5. Glue the tabs to hold the dice together.
6. Roll the dice and see where your safety conversation lands.
7. Note down key points from the conversations, including any actions that need to be taken.

Need help thinking of Discussion Dice talking points? Consider:

- the objective of your SafeTea or SafeToolbox chat. For example, to educate workers, identify WHS hazards or learn more about others' safety experiences in the workplace.
- what safety topics are most relevant to discuss in your workplace. Explore our 'Safety by topic' webpage for inspiration.
- how you engage your team in WHS discussions. For example, you could ask workers to share their experience managing WHS risks or seek their collaboration on problem-solving a particular WHS issue at your workplace.
- how data can reinforce the need to manage health and safety risk. See our data website (data.safeworkaustralia.gov.au) for statistics on WHS hazards and industries.
