DEAR SIR'S OR MADAM'S,

I MAKE THIS SUBMISSION AS A PRIVATE CITIZEN. MY CONCERNS ARE FOR RESIDENTS WHO LIVE NEXT TO MINES AND QUARRIES. PEOPLE LIVING NEXT TO QUARRIES HAVE NO PROTECTION UNDER THE WORKPLACE HEALTH AND SAFETY LEGISLATION AND THEY SHOULD HAVE. DANGEROUS LEVELS OF SILICA DUST (PM 2.5) DO NOT STOP AT A QUARRIES BOUNDARY, YOU CAN NOT HAVE A QUARRY WORKER IN PROTECTED OUGALLS AND FACE MASK, AND TWO FEET AWAY ON PRIVATE PROPERTY, A RESIDENT WITH NO PROTECTION. IF THAT RESIDENT GETS SICK, BECAUSE OF FALLOUT FROM A MINE AND QUARRY, THEY SHOULD BE ABLE TO SUE THE COMPANY AND THE GOVERNMENT FOR LETTING IT HAPPEN. NEW LAWS MUST BE PUT IN PLACE TO PROTECT THE PUBLIC FROM INTRODUCTION OF QUARRIES ON THEIR LAND.

- 1/ QUARRIES NEED TO BE 1 TO 3 KS FROM PEOPLES BOUNDRIES
- 2/ A AUSTRALIAN WIDE LEVEL OF RESPIRABLE PARTICULATE MATTER SHOULD BE (P.M. 2.5) AS IN VICTORIA AND NOT (P.M 10)
- 3/ RESIDENTS LIVING NEXT TO OR NEAR QUARRIES NEED THE SAME HEALTH & SAFETY CONDITIONS AS QUARRY WORKER
- 4/ RESIDENT LIVING NEXT TO OR NEAR QUARRIES, SHOULD HAVE COMPULSARY X-RAYS EVER 2 YEARS (ESPECIALLY CHILDREN)
- 5/ ONCE YOU OR YOUR CHILD GETS SILICOSIS? THERE IS NO CURE  
SILICOSIS CAUSES LUNG DISEASE AND LUNG CANCER

KIND REGARDS LUKE DASLISH

P.S. I DID SEND E-MAIL. SAYING I WOULD SUBMIT A WRITTEN SUBMISSION
