Minimising the risk of exposure to COVID-19: Delivery drivers

There are steps you can take to minimise your risk of exposure to the COVID-19 virus.

Managing the risks of exposure to the COVID-19 virus

Cleaning

- Regularly clean and disinfect your vehicle including steering wheel, door handles, buttons and keys.
- Clean and disinfect your phone or electronic device used to help deliver food or parcels. Disinfect these often by using a lint-free cloth and 70% isopropyl alcohol if you can, or disinfectant wipes.

Hygiene

- Avoid touching your mouth, eyes, and nose with unwashed (or gloved) hands.
- Clean your hands thoroughly for at least 20 seconds using soap and water, or alcohol based hand rub.
- Wash your hands after coming into contact with money.
- Cover your nose and mouth when coughing and sneezing with a tissue or a flexed elbow. Put tissues in the bin.

Physical distancing

- Maintain a 1.5 metre distance to others (two arms length).
- Avoid close contact with anyone with cold or flu-like symptoms.
- Stay home if you are sick.
- Seek medical advice if you have a fever, cough, sore throat or shortness of breath (call your doctor or healthdirect on 1800 022 222).

How do I physically distance myself when delivering food or parcels to people?

- Maintain at least 1.5 metres from other people.
- Wash hands using alcohol-based hand rub before and after handling food deliveries or parcels. If using gloves, make sure you use an alcohol-based hand rub before touching the gloves and once more after taking them off.
> Leave the food or parcel at the door then text or use the relevant app to let the recipient know it is there.
> If an electronic signature is required, talk to your employer or the business you are working for about implementing no contact deliveries. Otherwise practice good hand hygiene and use an alcohol-based hand rub before and after the delivery and wipe down all equipment, for example, with disinfectant wipes, including the pen and the electronic device used to obtain the signature.

*Do I need to wear a mask?*

It is not necessary to wear a mask if you are not experiencing flu like symptoms. The Australian Government Department of Health currently advises that a surgical mask will not prevent a person from being exposed to the COVID-19 virus.

Implementing the above steps of good hygiene, physical distancing and regular cleaning is an effective way to minimise exposure to the COVID-19 virus.

**Further information and resources**

**If you are feeling stressed and anxious about COVID-19**

It is normal to feel stressed during this time. Talk to your employer about your concerns as they may have an employee assistance program that can help you during this time.
